

Cable Storage Ring

ARIA's Cable Storage Ring provides mechanical support and protection for cable service loops.

This 12" diameter ring is designed for inside plant fiber optic cable and copper cable.

This product can be used in intermediate distribution frames, main distribution frames, and telecommunications closets.

For double the capacity, install two storage rings side by side and route the cable in a figure eight pattern.

Eliminates rework from moves and changes to terminal locations and layouts.

Features

- Six removable, adjustable Velcro® loops contain and secure cable
- The Velcro® loops allow conformance to copper and fiber bend radius requirements and prevent physical damage to the cable
- The Cable Storage Ring mounts to a wall using three screws

Specifications

Parameter	Value
Capacity	25 feet of 2-fiber singlemode or multimode optical fiber cable
Ring Material	Black powdercoated steel
Dimensions	11.5" diameter, 1.9" wide
